NIPPON COLUMBIA CO., LTD.

IMPORTANT TO SAFETY

WARNING:

TO PREVENT FIRE OR SHOCK HAZARD, DO NOT EXPOSE THIS APPLIANCE TO RAIN OR MOISTURE.

CAUTION:

1. **Handle the power supply cord carefully**
Do not damage or deform the power supply cord. If it is damaged or deformed, it may cause electric shock or malfunction when used. When removing from wall outlet, be sure to remove by holding the plug attachment and not by pulling the cord.
2. **Do not open the top cover**
In order to prevent electric shock, do not open the top cover. If problems occur, contact your DENON DEALER.
3. **Do not place anything inside**
Do not place metal objects or spill liquid inside the CD player. Electric shock or malfunction may result.

CAUTION
RISK OF ELECTRIC SHOCK
DO NOT OPEN

CAUTION: TO REDUCE THE RISK OF ELECTRIC SHOCK, DO NOT REMOVE COVER (OR BACK). NO USER-SERVICEABLE PARTS INSIDE. REFER SERVICING TO QUALIFIED SERVICE PERSONNEL.

The lightning flash with arrowhead symbol, within an equilateral triangle, is intended to alert the user to the presence of uninsulated "dangerous voltage" within the product's enclosure that may be of sufficient magnitude to constitute a risk of electric shock to persons.

The exclamation point within an equilateral triangle is intended to alert the user to the presence of important operating and maintenance (servicing) instructions in the literature accompanying the appliance.

安全注意事項

CAUTION
RISK OF ELECTRIC SHOCK
DO NOT OPEN

注意：為減少觸電危險，切勿折下機殼（或機背）。機身內並無用戶修理用零件。請交由專業修理人員修理本機。

三角形內有箭頭的閃電符號旨在提醒用戶，本產品機殼內有未經絕緣的「危險電壓」，其幅度足以使人觸電而發生危險。

三角形內加感嘆號旨在提醒用戶，有重要的操作與維修說明書配合本機。

警告：為減少著火或觸電危險，切勿讓本機受雨淋濕或受潮。

注意：

為防觸電，切勿將此（有極性的）插頭隨意配用延長電線、插座或其它媒体插口，除非各插腳能完全插到底而不露出金屬部分。

Please, record and retain the Model name and serial number of your set shown on the rating label.
Model No. DCD-1880AR/1550AR Serial No. _____

NOTE:

This CD player uses the semiconductor laser. To allow you to enjoy music at a stable operation, it is recommended to use this in a room of 5°C (41°F) — 35°C (95°F).

重要安全事項

警告：

為防著火或觸電，切勿讓本機遭雨淋濕或受潮。

注意：

1. **小心處理電源引線**
勿使電源引線損壞或變形。若有損壞或變形，使用時即易造成觸電或失靈。從牆壁插座拔下時一定要抓住插頭部分拔，切勿拖拉電線。
2. **切勿拆開頂蓋**
為防觸電，切勿拆開頂蓋。有問題應請教DENON經銷商。
3. **勿在機內放任何物件**
勿在機內放置金屬物體或液體。否則會觸電或失靈。

注意：本雷射唱盤使用半導體激光器。為了使你能在平穩操作狀態下欣賞音樂，本機最好在室溫 5°C (41°F) 至 35°C (95°F) 之間使用。

NOTE ON USE

• Avoid high temperatures Allow for sufficient heat dispersion when installed on a rack.	• Keep the set free from moisture, water, and dust.	• Do not let foreign objects in the set.
• Unplug the power cord when not using the set for long periods of time.	• Do not let insecticides, benzene, and thinner come in contact with the set.	• Never disassemble or modify the set in any way.
• Handle the power cord carefully. Hold the plug when unplugging the cord.	* (For sets with ventilation holes) • Do not obstruct the ventilation holes.	

使用注意事項

防止高溫 • 勿將本機放置於受烈日曬曬或靠近發熱器材的位置。	注意濕氣、水和塵 • 勿將本機放置於濕度很高或多塵的位置。花瓶或其它有水的物件均不宜擺在本機上方。	勿讓雜物掉入機內 • 特別要注意勿讓針、髮夾、硬幣等進入本機。
機架／機箱安裝注意 • 避免將本機裝於密封的機架內。 • 裝於機架或機箱時，要配備足夠大的通風孔，以加強散熱。	當你外出時 • 長時間不用本機時，例如外出旅行時，須將插頭拔離電源插座。	保護機殼 • 避免在本機附近噴灑殺蟲劑，勿用汽油、天拿水或溶劑洗機箱，因這類液體易引起品成顏色改變。清潔要用軟布，在用化學處理過的布擦時請小心遵守說明書規定。
留意電源線 • 從插座拔出插頭時切勿拔電源線，應抓住插頭將其拔出。	勿堵塞機殼的通風孔 • 堵塞通風孔會損壞本機。 • 各通風孔對本機內部散熱異常重要。必須特別留意，若通風孔有物件阻擋，就會使機內溫度升得很高。	勿打開機殼 • 打開機殼頂蓋或底蓋，及伸手入機殼內部是危險的。切勿打開機殼。如果本機表現有不受管時，宜立刻拔下電源插頭，再與購入本機的商店或鄰近經銷商聯絡。

Thank you for purchasing this DENON Compact Disc Player. Please read the operating instructions thoroughly in order to acquaint yourself with the CD player and achieve maximum satisfaction from it.

(4) R6P AA Dry Cell Battery	2
(5) AC Cord	1
(6) Service Station List	1

FEATURES

The DCD-1880AR/1550AR is a CD player which uses DENON's unique λ SLC (Super Linear Converter) for eliminating loss of sound quality in the PCM playback section to offer playback of the same sounds as those in the studio or hall where the CD was recorded. In addition, the use of carefully selected parts makes this a high performance CD player reproducing the original sound field with rich musical expression.

(1) Ultimate signal reproduction thanks to the alpha processor

The high speed interpolation operations of the alpha processor reproduce the LSB (lowest significant bit) data lost from the disc upon recording to provide a smooth waveform. The audible effects of alpha processing are particularly great during playback at low levels at the instant the sound fades out.

(2) High precision D/A converter

The DCD-1880AR/1550AR uses an λ SLC (lambda super linear converter) that theoretically eliminates all zero-cross distortion, the main cause of reduced sound quality. This in combination with the multi-bit high precision 20-bit D/A converter increases sound reproduction performance, particularly at low volumes.

(3) Dual coil transformer

To preserve the purity of the sound, separate power transformer coils are used for the digital and audio sections, thereby greatly reducing interference from the digital section on the audio section.

(4) Digital Output (OPTICAL/COAXIAL)

The data on the compact disc is output in digital format, so the music can be reproduced on an external digital processor or MD Recorder.

NAMES AND FUNCTIONS OF PARTS

FRONT PANEL (The DCD-1550AR FRONT PANEL model name inscription shows DCD-1550AR.)

REAR PANEL

1 Power Operation Button (POWER)

- When the power is turned on, "P" appears on the TIME display, and if no disc is loaded, "00" appears on the digital display.
- If the power is turned on with a disc already loaded, the total number of tracks on the disc is displayed on the TRACK NO. display, the total time is displayed on the TIME display, the numbers on the music calendar light up to the number of tracks on the disc, and playback begins.

2 Headphones Jack (PHONES)

- For private listening, you can connect your headphones to this jack. Do not raise the volume level too much when listening through headphones. (Headphones are sold separately.)

3 Volume Control (PHONES LEVEL)

- Use this to adjust the output level (VOLUME) of the headphones.

4 Remote Control Sensor (REMOTE SENSOR)

- This sensor receives the infrared light transmitted from the wireless remote control unit.
- For remote control, point the supplied remote control unit RC-251 towards this sensor.
- When a signal is transmitted from the remote control unit, the remote control indicator in the display 5 will light up briefly.

5 Display

- The digital display is divided into sections, such as displays for track number, index, playback time and calendar, as shown below.

6 Display Button (DISPLAY)

- Press this button to change the brightness of the display.
- Press once to make the display 2/3 as bright as normal.
- Press again to make the display 1/3 as bright as normal.
- Press once again to turn the entire display off during playback and all but the track number off in any other mode.

7 Open / Close Button (OPEN / CLOSE)

- The disc holder is opened and closed by pressing this button.
- Press this button once to open the disc holder, and once again to close it.
- When the disc holder is closed with a disc loaded, the disc will rotate for a couple of seconds while the disc contents are read. The number of tracks and total playback time on the disc are then displayed on the digital display.

8 Pause Button (PAUSE)

- Press this button to stop playback temporarily.
- If this button is pressed during playback, playback is stopped temporarily, the $\triangleright$ indicator goes out and the Π indicator lights.
- Press this button or the play button (▶) again to continue playback.

9 Pitch - Button (PITCH -)

- Press this button to slow down the playing speed. (Refer to page 13.)

10 Jog Dial (◀◀▶▶)

- Turn this to move to the beginning of the desired track. (Refer to page 8, 9.)

11 Pitch + Button (PITCH +)

- Press this button to make the playing speed faster. (Refer to page 13.)

12 Manual Search Forward Button (▶▶)

- Press this button during playback for fast forward search. As long as the button is kept pressed, music signals are played back faster than normal.
- Pressing this button when the pause mode is engaged, you can quickly forward the pickup to a desired position, three times faster compared to manual forward search during playback. During this time, no sound is heard.

13 Manual Search Reverse Button (◀◀)

- Press this button during playback for fast reverse search. As long as the button is kept pressed, music signals are played back faster than normal.
- Pressing this button when the pause mode is engaged, you can quickly reverse the pickup to a desired position, three times faster compared to manual reverse search during playback. During this time, no sound is heard.

14 Stop Button (■ STOP)

- Press this button to stop playback. The disc will stop rotating, and the number of tracks and total playing time of the disc are displayed on the TRACK NO. and TIME displays, respectively.
- In case programmed playback is engaged when this button is pressed, the number of tracks and total playing time of the program are displayed.

15 Play Button (▶ PLAY)

- Press this button to start playback of a disc.
- When this button is pressed, $\triangleright$ is displayed, and the track number being played is displayed together with the elapsed playback time of the track.
- Tracks are shown on the calendar display. Once a track has been played, the corresponding track number goes out on the calendar display.

16 Disc Holder

- Place the disc on the disc holder with the label facing up.
- Use the open/close button (OPEN / CLOSE) to open and close the disc holder.
- The disc holder may also be closed by pressing the play button (▶ PLAY) or pause button (PAUSE).

17 Output Terminal (FIXED-VARIABLE)

- Connect these jacks to the input jacks on your amplifier. (Refer to page 7 for details on the connections.)
- Fixed Output Jacks (FIXED):** These jacks output a signal of fixed volume level.
- Variable Output Jacks (VARIABLE):** These jacks output a signal of a volume level which is varied by the remote control volume button. When the power is switched on, the output level is automatically set to -10 dB. (" -10 " is displayed for 2 seconds in the TIME section of the display panel.)

18 Digital Output Jack (COAXIAL)

- This jack outputs digital data.
- We recommend using a 75 Ω /ohm pin cord (available in stores) for connections.

19 Digital Output Jack (OPTICAL)

- Digital data is output in optical form from this jack.

20 SYNCHRO Jack

- To make a synchronized recording, this jack must be connected to the SYNCHRO jack of the deck with a connection cord. (See page 7 for connections.)

21 Voltage Selector Switch (VOLTAGE SELECTOR)

- Do not twist the VOLTAGE SELECTOR switch with excessive force as this may cause damage.
- If the VOLTAGE SELECTOR switch does not turn smoothly, please contact a qualified serviceman.

22 AC INLET

- Connect the included AC cord here.

CONNECTION

(1) Connecting the Output Terminal (FIXED-VARIABLE)

Use the included pin cords to connect the left (L) and right (R) output terminal (FIXED-VARIABLE) of the DCD-1880AR/1550AR to the CD, AUX, or TAPE PLAY left (L) and right (R) input jacks of the amplifier. There are two types of output jacks, one of the variable type and one of the fixed type. Be sure to use the variable outputs if you want to be able to control the output level from the DCD-1880AR/1550AR.

(2) Connecting the Digital Output Jack (COAXIAL)

Use a 75 Ω /ohm pin cord to connect the digital output jack (COAXIAL) of the DCD-1880AR/1550AR to the digital input jack (COAXIAL) on a digital processor or a MD recorder, available in stores.

(3) Connections to the Digital Optical Output Jack (OPTICAL)

Use an optical fiber cable to connect the digital optical output jack on the DCD-1880AR/1550AR to the optical input jack on a digital processor or a MD recorder.

(4) SYNCHRO Jack Connections

Connect the SYNCHRO jack with a DENON cassette deck which is equipped with a SYNCHRO jack, then make a synchronized recording. Use the connection cord supplied with the cassette deck. To make use of this function, also connect the output jacks and make the settings so that a recording can be made from the CD player to the cassette deck.

Connection Precautions

- Before proceeding with connections or disconnections of cables and power cords, be sure to turn all system components off.
- Ensure that all cables are connected properly to the L (left) and R (right) jacks.
- Insert plugs fully into the terminals.
- Connect the output jacks to the amplifier CD, AUX or TAPE PLAY input jacks.

OPENING AND CLOSING THE DISC HOLDER AND LOADING A DISC

Opening and closing the disc holder (This operation only works while the power is on.)

- Press the power operation button (POWER) to turn on the power.
- Press the open/close button (OPEN / CLOSE).

How to load a disc

- Make sure the disc holder is completely open.
- Hold the disc by the edges and place it on the disc tray. (Do not touch the signal surface, i.e., the glossy side.)
- When using 12 cm. diameter discs, make sure the outer edge matches the tray guide circumference (Fig. 1), and when using CD singles (8 cm. diameter) match the outer edge with the inner tray guide circumference. (Fig. 2)
- Press the open/close button (OPEN / CLOSE) to close the disc holder.

- When the disc holder is closed, the disc is read and after a few seconds the number of tracks and total playing time are displayed on the TRACK NO. and TIME displays, respectively.
- When the disc holder is open and a disc is loaded, you may also press the play (▶) button or pause (PAUSE) button to close the disc holder. If the play button (▶) is pressed, playback will start immediately upon the disc contents having been read.)

Caution:

- If your finger should get caught in the disc holder when it closes, press the open/close button (▶ OPEN/CLOSE).
- Do not place any foreign objects on the disc tray, and do not place more than one disc on the tray at a time. Otherwise malfunction may occur.
- Do not push in the disc tray manually when the power is off as this may cause malfunction and damage the CD player.

NORMAL CD PLAYBACK

(1) Starting Playback

- Turn the power operation button on and load the disc.
- Press the play button (▶) (PLAY).
- The number of the track currently playing, the index number, and the elapsed time, etc., are displayed.

(2) Stopping Playback

- Press the stop button (■) (STOP).
- The stop mode is set automatically once all tracks on the disc are played.

NOTES:

- If no disc is loaded or if the disc is loaded upside-down, the track number, index, and time displays will all read zero, and the entire calendar will light.

- If the information at the innermost side of the disc cannot be read properly due to dirt or scratches, the display will be as shown below, and the number of tracks and remaining time per track will not be displayed. Also, the search operation may take longer than usual.

When data cannot be read properly

ADVANCED CD PLAYBACK

(1) Playing a Specific Track

Direct Search
(Remote control only)

(Number buttons)

- Use the number buttons and the +10 button to input the number of the desired track.
For example, to play the fourth track press [4], and to play the 12th track press [+10] and [2]. The beginning of the track is found and playback starts.

(2) Moving to Following Tracks During Playback

Automatic Search
(Remote control unit)

Turn the jog dial on the main unit clockwise (↻) or press the automatic search forward button (▶▶) on the remote control unit.

- Either turn the jog dial on the main unit clockwise (↻) or press the automatic search forward button (▶▶) on the remote control unit.
- During the search operation, turn the jog dial on the main unit clockwise (↻) again or press the automatic search forward button (▶▶) on the remote control unit again to move further on to the beginning of the following track.

(3) Returning to the Beginning of the Current Track

Turn the jog dial on the main unit counterclockwise (↺) or press the automatic search reverse button (◀◀) on the remote control unit.

- Either turn the jog dial on the main unit counterclockwise (↺) or press the automatic search reverse button (◀◀) on the remote control unit.

- During the search operation, turn the jog dial on the main unit counterclockwise (↺) again or press the automatic search reverse button (◀◀) on the remote control unit again to move further back to the beginning of previous track.

(4) Finding Sections Within a Track

Index Search
(Remote control only)

- Use this function to start playback from certain sections within a track divided by index numbers.

- Press the INDEX button. "—" appears at the TRACK NO. display.

- Use the number buttons to specify the track number.
"—" now appears at the INDEX display. Input the desired index number. Playback starts from there.
For example, to start listening from index number 2 on track 3; press INDEX, 3 and 2.

Indexes

- Indexes are numbers which are assigned to sections within a track. Check the disc's explanatory notes for the index numbers.
- If you make an index search for an index number that is not on the disc, playback will start from the last index number on the track.

(5) Playing Specific Tracks in a Specific Order

Programmed Play

- With this function, you can choose any of the tracks on the disc and program them to play in any order.
- Programming is possible with the disc holder open.
- Up to 20 tracks can be programmed.
- The programmed tracks are shown on the calendar.

(1) Programming

(Remote control only)

- The PROGRAM indicator lights when the program button (PROGRAM) is pressed. Next, use the number buttons and the +10 button to program the tracks.
To program tracks 3, 12, and 7, for example, press [PROGRAM], [3], [+10], [2] and [7].
The track number lights on the calendar each time a track is programmed. The number of tracks programmed is displayed at the index display, and the total playing time for the programmed tracks is indicated at the time display. After the tracks are programmed, the total number of programmed tracks is displayed at the track number display, and the total playing time for the programmed tracks is indicated at the time display.

(2) Checking the Programmed Tracks

(Remote control only)

- Press the CALL button.
The programmed tracks are displayed in order on the TRACK NO. display each time the CALL button is pressed.

(3) Playing the Programmed Tracks

- Press the ▶ PLAY button to play the tracks in the programmed order.

(4) Correcting Programs

(Remote control only)

- To correct a programmed track, first press the CLEAR button, then program the correct track.
The last track programmed is replaced with the correct track.
- To clear a track in the middle of the program, use the CALL button to call out that track, then press the CLEAR button to clear it from the program.

(5) Clearing the Entire Program

(Remote control only)

- Press the DIRECT button to clear the entire program. The entire program can also be cleared by pressing the OPEN/CLOSE button.
- If the DIRECT button is pressed during programmed playback, the program mode is cleared and normal playback continues from that track on.

NOTES:

- If the programming operation is performed in the play or pause mode, the current track is programmed as the first track in the program. Other programs can be added, but the number of programmed tracks and playing time will not be displayed.
- Direct search is not possible during programmed playback. Pressing the number buttons adds tracks to the end of the program.
- Programming is also possible when the disc holder is open. A track number greater than the number of tracks on the disc can be set in the program, but it will automatically be cleared from the program before playback starts.
- The remaining time per track can only be displayed for the first 20 tracks on the disc.
- The total program time and remaining program time as well will not be displayed if tracks numbers greater than 20 are programmed.

(6) Playing All Tracks Repeatedly

Repeat Playback
(Remote control only)

- Press the REPEAT button. The REPEAT indicator lights.
- The operation is the same whether button ① or ② is pressed first.
- The one-track repeat mode is set if the REPEAT button is pressed again during repeat playback.
- The all-track repeat mode is set even if the REPEAT button is pressed during playback.
- To cancel the repeat mode, press the REPEAT button twice.
- If the REPEAT button is pressed during programmed playback, the tracks are repeated in the programmed order.

(7) Playing a Single Track Repeatedly

One-track Repeat
(Remote control only)

Press the REPEAT button twice

- Press this button when you hear a track you want to play repeatedly.
- Press the REPEAT button twice during playback. The REPEAT indicator lights, and if you are at track number 20 or less, that number appears on the calendar display and that track is played repeatedly.
- For track numbers 21 and above, the track number is not displayed on the calendar display but the one-track repeat mode will function.
- If the REPEAT button is pressed twice in the stop mode, track number 1 appears on the calendar display and one-track repeat is possible. Press the PLAY button to start playback.
- Press the REPEAT button once again to cancel the one-track repeat mode. The display and playback return to normal.

(8) Stopping Momentarily During Playback

Pause

- Playback can be stopped momentarily then resumed from the same point.

- Press the pause button (PAUSE).

- Press the play button (▶ PLAY) or the pause button (PAUSE).
 - To resume playback, press either the play button (▶ PLAY) or the pause button (PAUSE).

(9) Finding a Track While Listening at High Speed

Manual Search

- You can skip through the disc while listening at high speed. This function comes in handy for finding a certain part in the middle of a long track and starting playback from there.
- Once you find the desired position using the manual search operation, release the manual search forward button (▶▶) or manual search reverse button (◀◀) to start normal playback.

(1) Manual Search Forward

Hold in the manual search forward button (▶▶).

- During playback, press and hold in the manual search forward button (▶▶) to skip through the disc while listening at high speed.
 - The number of the track being skipped through, the index, number, and the elapsed time for that track are indicated on the display window.
 - In the pause mode, the disc moves at about three times the speed as during the play mode, but no sound is heard.
 - When the end of the last track is reached while pressing the manual search forward button (▶▶), "JJ" appears on the display window and the manual search operation is stopped. To resume playback, press the manual search reverse button (◀◀), then do another operation once the "JJ" disappears from the display.

(2) Manual Search Reverse

Hold in the manual search reverse button (◀◀).

- During playback, press and hold in the manual search reverse button (◀◀) to skip through the disc while listening at high speed.
 - The display is the same as during the manual search forward operation.
 - In the pause mode, the disc moves at about three times the speed as during the play mode, but no sound is heard.
 - When the beginning of the first track is reached while pressing the manual search reverse button (◀◀), "CC" appears on the display window and the manual search operation is stopped. To resume playback, press the manual search forward button (▶▶), then do another operation once the "CC" disappears from the display.

(10) Inserting Blanks Between Tracks

Auto Space
(Remote control only)

- This function inserts blank spaces between tracks, making editing easier.

- The AUTO SPACE indicator lights when the auto space button is pressed.
- Press the play button (▶ PLAY) to start playback. When the end of a track is reached, a blank space of approximately 4 seconds is inserted before the beginning of the next track.
- Press the auto space button again to turn the auto space function off.

(1) Pausing At the Beginning of a Track After Searching

Pause

- Direct Search (Remote control only)
 - Pausing at the beginning of a track found with the direct search operation comes in handy.

(2) Pausing At the Beginning of a Track After Searching

- Press the pause button (II PAUSE).
- Use the number buttons to set the desired track.
 - To start playback, press either the play button (▶ PLAY) or the pause button (II PAUSE).

(2) Program Search

(Remote control only)

- Press the pause button (II PAUSE) after programming tracks. The beginning of the first track in the program is found and the disc is paused there.

(12) Playing Tracks in Random Order

Random Playback
(Remote control only)

- All of the tracks recorded on the disc can be played once in random order.

- When the random button (RANDOM) is pressed, the RANDOM indicator lights and random playback starts automatically.
- If the random button (RANDOM) is pressed when tracks are programmed, only the programmed tracks are played at random.
- If the random button (RANDOM) is pressed when the repeat function is set, all tracks will be played through once in random order, after which all tracks will be played through again in different order, and so on.
- During the search operation, the track numbers from the first to the last track on the disc are displayed in rapid succession on the track number display, so you cannot tell what track is going to be played next until playback begins.

NOTES:

- The total remaining time is not displayed during the random mode.
- The auto edit mode is cancelled if the random button (RANDOM) is pressed during the random mode.

15 Edit Recording on Sides A and B of the Tape

Auto Edit
(Remote control only)

The auto edit function automatically divides the tracks on the compact disc into sides A and B, with the division at the beginning of a track in such a way that the disc's total playing time is divided as close as possible by one half.

- When the AUTO EDIT button is pressed in the stop condition, the total play time of side A (the first half) and the track numbers (on the calendar) are displayed for about 2 seconds. Next, the side B (last half) information is similarly displayed after which the player automatically pauses at the beginning of the first track of side A. EDIT and PROGRAM will be lit on the display at this time.
- Pressing the play button (▶ PLAY) or the pause button (⏸ PAUSE) will start the play mode. When side A has finished playing, the player will pause at the beginning of the first track on side B.
- Pressing the play button (▶ PLAY) or the pause button (⏸ PAUSE) again will start the play mode. When side B has finished playing, the player automatically stops.

16 Fading Out or Fading In at the Desired Location

Fader Function
(Analog output only)

- Fading out and fading in is possible at the desired position during play

Manual Fader
(Remote control only)

1 Fade Out

When the fader button (FADER) is pressed during play, fade out will be provided for about 5 seconds. (FADE) will light up during the operation and (▶) will flash. When fade out is completed the player will automatically pause.

2 Fade In

When the fader button (FADER) is pressed from the pause mode, the player will start playing and fade in will be provided for about 3 seconds. (FADE) will light up during the operation and (▶) will flash.

(2) Setting the Fade Out Time In Advance (TIME FADE)

(Remote control only)

- When the fader button (FADER) is pressed in the stop mode, the FADE indicator (FADE) will light up, TIME will appear as 00:00 s, and the player will wait for the input of the fade out time.
- Input the fade out time with the (0-9) number buttons.
- Pressing the play button (▶ PLAY) will start the playback and the FADE indicator (FADE) will light up.
- The (▶) indication will start flashing 5 seconds before the specified fade out time and then the fade out will begin. The fade out will end at the specified time and the player will automatically pause.

The time fade function will be cancelled if an auto search or manual search is performed during playback.

15 To Search for the Peak Level of the Disc

Peak Search
(Remote control only)

- The player searches for the peak portion and plays a few seconds either side of this point repeatedly. This is convenient for making recording adjustments on the tape recorder.

- When the peak search button (PEAK) is pressed in the stop mode, the PEAK indicator will flash and the player will search for the portion having the peak level.
- After the search, the PEAK indicator lights up and a few seconds either side of the peak level point are played back repeatedly. This is convenient for making recording adjustments on the tape recorder.
- To cancel the peak search, press the stop button (■ STOP).
- When the play button (▶ PLAY) or the pause button (⏸ PAUSE) is pressed during peak search or while playing the peak portion back repeatedly, the player will go to the beginning of the first track (the first track of the program for program playback, or the track that was first selected in the time edit) and begin playback from here if the play button was pressed or enter the pause mode if the pause button was pressed.

NOTES:

- The peak search function reads the level of the disc from the beginning of the disc to the end at a fixed interval and regards the maximum value that was read as the peak.
- Peak search takes a little time for this reason.
- The peak portion may change each time the disc is read and there may be a slight difference in the actual peak level, but since this difference is ever so slight there will be no adverse effects on the adjustment of the recording level.
- The time fade function is cancelled when the peak search operation is performed. To use the time fade function, set to the stop mode then reset the function.
- Buttons other than the open/close button (▲ OPEN/CLOSE), play button (▶ PLAY), pause button (⏸ PAUSE), and stop button (■ STOP) will not function during peak search or repeat play of the peak portion.

16 Changing the Speed of Playback

Pitch Control

- Playback can be speeded up or slowed down.

PLAYBACK USING THE REMOTE CONTROL UNIT

The accessory RC-251 remote control unit can be used to control the CD player from a convenient distance.

(1) Inserting the dry cell batteries

- Remove the battery cover on the back of the remote control unit.

- Insert two R6P (standard size AA) dry cell batteries with correct polarity as indicated inside the battery compartment.

- Replace the battery cover.

Notes on the Batteries

- The remote control unit uses standard size AA dry cell batteries.
- The batteries will need to be replaced approximately once a year. Replacement may be necessary earlier depending on how much the remote control unit is used.
- If, in less than a year from the time new batteries were inserted, the remote control fails to operate the CD player from a near-by position, it is time to replace the batteries.
- Insert the batteries properly, following the polarity diagram inside the battery compartment, in other words make sure (+) and (-) terminals are properly aligned.

- Press the PITCH + or PITCH - button during the play or pause mode to change the speed of playback.
- When one of the PITCH buttons is pressed, the amount of the speed change appears on the seconds section ("S") of the TIME display for approximately 2 seconds. "PITCH -" appears when the speed is slower than normal, "PITCH +" when the speed is faster than normal. The speed can be changed in steps of 0.1% from -12.0% to +12.0%.
- Press the PLAY button (▶ PLAY) during playback with a different speed to return to normal speed playback.

NOTES:

- No data is output from the digital output jack (OPTICAL) during playback with a different speed (when "PITCH" is lit). If you want to output data, press the PLAY button (▶ PLAY) to return to normal speed playback.
- The pitch also changes when the speed is edited.
- If the speed is changed during the time edit operation, the total playing time changes, so the time of the blank space is not calculated accurately.
- The time display (elapsed playback time, remaining time per track, or total remaining time) will not be accurate during playback with a different speed.
- A maximum of 3 seconds is required to return to the normal speed when the play button (▶ PLAY) is pressed during playback with a different speed. During this time, only the open/close (▲ OPEN/CLOSE) and stop buttons (■ STOP) will function.

- Batteries are prone to damage and leakage.

Therefore:

- Do not combine new batteries with used ones.
- Do not combine different types of batteries.
- Do not jumper opposite poles of the batteries, expose them to heat, break them open nor expose of them in open fire.
- If the remote control unit is not to be used for a long period of time, remove the batteries from the unit.
- If the batteries have leaked, remove any traces of battery fluid from the battery compartment, wiping thoroughly with a dry cloth. Then insert new batteries.

(2) Directions for Use

- Operate the remote control unit while pointing it towards the remote control sensor on the CD player (see below).

When a remote control signal is received, the remote control indicator on front of the CD player lights briefly.

- The remote control unit can be used at a distance up to 8 meters in a straight line from the CD player. This distance decreases if there are obstructions blocking the signal path or when the remote control unit is operated at an angle from the remote control sensor.
- The buttons on the remote control unit have identical functions with those on the CD player.

Cautions on Use

- Do not press the operation buttons on the main unit and on the remote control unit simultaneously, as this will result in malfunction.
- The remote control unit may not operate properly if the remote control sensor is exposed to direct sunlight or strong artificial lighting, or if there is an object between the remote control unit and the remote control sensor.

REMOTE CONTROL UNIT RC-251

Direct Search

Normally, direct search is possible simply by pressing the desired number buttons.

Program Search (During playback, the track which is currently playing is programmed as the 1st track.)

Press the PROGRAM button, then press the number buttons. For example, to program tracks number 3, 11 and 5, press PROGRAM → 3 → + 10 and 1 → 5.

To cancel the program, press the DIRECT button.

Clear button

This button is used both for clearing when in the program mode and for clearing the index search mode.

Inputting the Track Numbers

For track numbers below 9, simply press the corresponding button. For track numbers of 10 and greater, press the + 10 then the number buttons. For example, for track number 22 press + 10 twice then 2.

Volume

When a volume button is pressed, "—" appears in the minutes portion (M) of the TIME display and the level is displayed at the seconds portion (S) for approximately 2 seconds. The maximum level is 0, the minimum -50. There are 50 steps, one step corresponding to about 1.5 dB.

- Do not write on the disc and do not attach any labels.
- Condensation will form on the disc surface if it is brought into a warm room from a cold area, such as outdoors during winter. Wait until the condensation disappears. Never dry discs with hair dryers, etc.

Precautions on storage

- After playing a disc, always return it to its case.
- Keep discs in the cases when they are not to be played. This will protect them from dust and dirt and prolong their service life.
- Do not store discs in the following places:
 - Places exposed to direct sunlight for a considerable time.
 - Places subject to accumulation of dust or high humidity.
 - Places exposed to high temperatures, such as close to heater outlets.

THE COMPACT DISC

1. Use compact discs that include the mark.

CD's with special shapes (heart-shaped CDs, octagonal CDs etc.) cannot be played on this set.

Attempting to do so may damage the set. Do not use such CDs.

2. Precautions on handling compact discs

- Do not allow fingerprints, oil or dust on the surface of the compact disc. If the signal surface is dirty, wipe it off with a soft, dry cloth. Wipe in circular motions from the center and out.
- Do not use water, benzene, thinner, record sprays, electrostatic proof chemicals, or silicone-treated cloth to clean discs.
- Always use care when handling discs to prevent damaging the surface, in particular when removing a disc from the case and returning it.
- Do not bend compact discs.
- Do not apply heat to compact discs.
- Do not enlarge the hole in the center of the disc.

TIMER-CONTROLLED PLAYBACK

Operation

- Turn on the power of all system components.
- Set the input selector on the amplifier to correspond to the inputs the CD player is connected to.
- Make sure a disc has been loaded in the disc holder.
- Check the time on the timer and then set the desired turn-on time.
- Turn the audio timer ON. Power is turned off automatically in all components connected to the timer.
- When the preset turn-on time is reached, power is turned on in the system components, and CD playback starts from the first track.

Connection

INSTALLATION PRECAUTIONS

The CD player uses a microcomputer for controlling internal electronic circuits. In the event that the player is used while a near-by tuner or TV is turned on, although unlikely, interference could occur either in the sound from the tuner or the picture of the TV. To avoid this, please take the following precautions.

- Keep the CD player as far away from the tuner or TV set as possible.
- Keep the power cable and connecting cable of the CD player separate from the antenna wires of the tuner and TV.
- Interference is particularly likely to occur when an indoor antenna or a 300 Ω/ohm feeder cable is used. Thus, use of an outdoor antenna and 75 Ω/ohm coaxial cable is strongly recommended.

TROUBLESHOOTING

If the CD player does not seem to be functioning properly, check the following:

Disc holder does not open or close.

- Is the power on?

When a disc is loaded, is displayed.

- Is the disc loaded properly? See page 7, 8

When the play button (▶ PLAY) is pressed, playback does not start.

- Is the disc dirty or scratched? See page 14

There is no sound, or it is distorted.

- Is the output cord properly connected to the amplifier? See page 7
- Have the amplifier controls been set correctly?

A specific section of the disc will not play.

- Is the disc dirty or scratched? See page 14

Programmed playback does not work.

- Have programming been properly done? See pages 9 and 14

Incorrect operation when buttons on the remote control are pressed.

- Is the remote control unit being operated too far from the CD player? See page 13
- Are there obstacles blocking the ray?
- Is the remote control sensor exposed to strong light?
- Are the batteries exhausted?

No data is output from the digital output jack (OPTICAL/COAXIAL).

- Is the pin cord properly connected? See page 7
- Have you changed the speed of playback? See page 13

SPECIFICATIONS

AUDIO

No. of Channels:	2 channels
Frequency Response:	2 — 20,000 Hz
Dynamic Range:	100 dB
Signal-to-noise Ratio:	112 dB
Harmonic Distortion:	0.0025% (1 kHz)
Separation:	105 dB (1 kHz)
Wow & Flutter:	Below measurable limit: (± 0.001% W, peak)
Output Voltage:	FIXED 2.0 V, VARIABLE 0—2.0 V
DISCS	Compact Disc format

GENERAL CHARACTERISTICS

Power Supply:	Voltage and frequency is shown on rating label
Power Consumption:	16 W
Dimensions:	434 (W) × 134 (H) × 340 (D) mm
Weight:	7.4 kg

FUNCTIONS AND DISPLAY

Functions:

Direct selection, automatic search, programmed playback, repeat playback, manual search, auto space, time mode, auto edit, peak search, fader, track number, time, music calendar, and engaged modes

Display:

DISASSEMBLY

(Follow the procedure below in reverse order when reassembling)

Top Cover

1. Remove 8 screws ① fixing the Top Cover on both sides and on the top.
2. Remove 2 screws ② on the rear.
3. Detach the Top Cover as shown in the arrow direction.

Front Panel

1. Disconnect FFC and Connector coming from the Front Panel.
2. Remove 5 upper and lower screws ③ and ④.
3. Pull and slant the top of the Front Panel first in the arrow direction, then detach it.

CD Mecha.

1. Remove 3 screws ⑤, ⑥ and detach the P.W.B. by releasing from 2 P.W.B. Holders.
2. Disconnect 4 Connector coming from the CD Mecha.
3. Remove 4 screws ⑦ and detach the CD Mecha.

CONFIRMING THE SERVO

A microcomputer adopted in this unit has the service programs so that each servo adjustment can be performed easily by the operating buttons.

This unit which adopted digital servo has the ability to automatically adjust Focus Gain, Focus Balance, Focus Offset, Tracking Gain, Tracking Balance, and Tracking Offset.

1. Actuating the Service Program

(1) Close the disc holder and turn power switch OFF.

(2) While pressing switch SW101 which is on the Main P.W.Board, turn power switch ON.

(Service program start actuates and displays track number 0 1.)

Note: The operating button do not function when service program actuates.

2. Operating Function at Service Program Actuation

Button Operation	Function	Description																					
 OPEN/CLOSE	Opens or closes the disc holder.	• Opens or closes when disc is stopped. • Operates other keys after open or close.																					
 STOP	Stops system operation.	• Displays track number 0 1. • Press when adjustment completed or correcting it.																					
 PLAY	Operates the Focus servo and turns disc.	• Displays track number 0 2 when operation is completed.																					
	Performs Focus servo, Tracking servo, Slide servo, Spindle servo and various automatically adjustment.	• Performs Tracking servo and Slide servo when pressing PLAY button. • Displays track number 0 3 when operation is completed. • When unusualness is existed, displays index number (error message). But E 9, E - is not error message.																					
	Displays automatically adjustment effect of EG, FBAL, FOFS, TG, TBAL and TOFS.	• Press  button when  button operation is completed. • When pressing  button every once, displays automatically adjusting value about FG, FBAL, FOFS, TG, TBAL, and TOFS in the sequence. • Displays following indication: <table> <thead> <tr> <th></th><th>INDEX</th><th>TIME</th></tr> </thead> <tbody> <tr> <td>FG</td><td>0 1</td><td>XXnXXs</td></tr> <tr> <td>FBAL</td><td>0 2</td><td>XXnXXs</td></tr> <tr> <td>FOFS</td><td>0 3</td><td>XXnXXs</td></tr> <tr> <td>TG</td><td>0 4</td><td>XXnXXs</td></tr> <tr> <td>TBAL</td><td>0 5</td><td>XXnXXs</td></tr> <tr> <td>TOFS</td><td>0 6</td><td>XXnXXs</td></tr> </tbody> </table>		INDEX	TIME	FG	0 1	XXnXXs	FBAL	0 2	XXnXXs	FOFS	0 3	XXnXXs	TG	0 4	XXnXXs	TBAL	0 5	XXnXXs	TOFS	0 6	XXnXXs
	INDEX	TIME																					
FG	0 1	XXnXXs																					
FBAL	0 2	XXnXXs																					
FOFS	0 3	XXnXXs																					
TG	0 4	XXnXXs																					
TBAL	0 5	XXnXXs																					
TOFS	0 6	XXnXXs																					
Other Buttons	No normal operation.	• Do not operate other button except above. • When an error occurs, immediately turn power switch OFF.																					

Note: Do not use remote control during service program operation.

3. Confirming Method

(1) Required Measuring Equipments for adjustment

1. Dual-trace oscilloscope
2. Adjustment disc TCD-784

(2) Adjustment location

(1) Confirming procedure

1. Actuate service program.
2. Load adjustment disc TCD784.
3. When pressing ◀◀ button, confirm error message (refer to table1).
4. Press ■ button.
5. When pressing ▶▶ button every once, confirm automatically adjusting values about FG, FBAL, FOFS, TG, TBAL and TOFS (refer to table 2 within the limits of value).
6. When service program is completed, return to normal mode (turn power switch ON).
7. Confirm HF level.

(4) Error message confirmation

1. When pressing ◀◀ button, displays track number 03.
2. Confirm error message with index number indication

TRACK INDEX TRACK INDEX TRACK INDEX

(a) 03 E- (b) 03 E9 (c) 03 no display

Defect is existing except above indication.

If an error occurs, the error message is displayed as following.

Error Message Table (table 1)

Indication		Contents
TRACK	INDEX	
03	E 1	Unable to adjust tracking offset
03	E 2	Unable to adjust focus offset
03	E 3	Unable to adjust focus gross gain
03	E 4	Unable to enter focus (include spindle)
03	E 5	Unable to enter tracking
03	E 6	Unable to adjust tracking gross gain
03	E 7	Unable to adjust tracking balance
03	E 8	Unable to adjust focus balance

(5) Confirm automatically adjustment values about FG, FBAL, FOFS, TG, TBAL and TOFS.

(1) Press ◀◀ button, displays track number **03**.

(2) Press ■ button, displays track number **01**.

(3) Press ▶▶ button 2 times, displays FG (Focus Gain Tentative) value, confirm the value within the limits of table 2.

(4) Press ▶▶ button, displays FBAL (Focus balance) value, confirm the value within the limits of table 2.

(5) Press ▶▶ button, displays FOFS (Focus offset) value, confirm the value within the limits of table 2.

(6) Press ▶▶ button, displays TG (Tracking Gain Tentative) value, confirm the value within the limits of table 2.

(7) Press ▶▶ button, displays TBAL (Tracking Balance) value, confirm the value within the limits of table 2.

(8) Press ▶▶ button, displays TOFS (Tracking Offset) value, confirm the value within the limits of table 2.

Confirming Table about Digital Servo Adjusting Value (table 2)

	TRACK INDEX	XXMXXS
FG	01 <u>01</u>	M66s~4M48s
FBAL	01 <u>02</u>	-1M28s~1M27s
FOFS	01 <u>03</u>	-M35s~M35s
TG	01 <u>04</u>	M40s~3M52s
TBAL	01 <u>05</u>	-1M28s~1M02s
TOFS	01 <u>06</u>	-M15s~M15s

(6) HF level Confirming

Connection						
Oscilloscope	Check	Step				
<table border="1"><thead><tr><th>V</th><th>H</th></tr></thead><tbody><tr><td>50mV/div or 20mV/div</td><td>0.2μs/div or 0.5μs/div</td></tr></tbody></table> Set input mode to ALTERNATE or CHOPPER.	V	H	50mV/div or 20mV/div	0.2μs/div or 0.5μs/div	A=0.40~0.85V Eye Pattern	- Press button. - Check HF level with oscilloscope. - Confirm that the waveform is in good shape. (◇ eye pattern in center must be able to discriminate clearly.)

MN662720 (IC104)

MN662720 Terminal Function

Pin No	Symbol	I/O	Function
1	BCLK	O	Bit clock output for SRDATA.
2	LRCK	O	L, R discriminating signal output.
3	SRDATA	O	Serial data output.
4	DVDD1	I	Power supply for digital circuit.
5	DVSS1	I	Ground for digital circuit.
6	TX	O	Digital audio interface signal output.
7	MCLK	I	Microcomputer command clock signal input (Latch data with leading edge).
8	MDATA	I	Microcomputer command data input.
9	MLD	I	Microcomputer command load signal input ("L": Load).
10	SENSE	O	Sense signal output (OFT, FESL, NACEND, NAJEND, POSAD and SFG).
11	FLOCK	O	Focus servo Lead-in signal ("L": Lead-in state).
12	TLOCK	O	Tracking servo Lead-in signal ("L": Lead-in state).
13	BLKCK	O	Subcode block clock signal (fBLKCK=75Hz).
14	SQCK	I	External clock input for subcode Q register.
15	SUBQ	O	Subcode Q code output.
16	DMUTE	I	Muting input ("H": Mute).
17	STAT	O	Status signal (CRC, CUE, CLVS, TTSTOP, FCLV and SQCK).
18	RST	I	Reset input ("L": Reset).
19	SMCK	O	8.4672MHz clock signal output at MSEL="H". 4.2336MHz clock signal output at MSEL="L".
20	PMCK	O	88.2kHz clock signal output.
21	TRV	O	Traverse forced feed output.

Pin No	Symbol	I/O	Function
22	TVD	O	Traverse drive output.
23	PC	O	Spindle motor ON signal ("L": ON).
24	ECM	O	Spindle motor drive signal (Forced mode output). 3-state.
25	ECS	O	Spindle motor drive signal (Servo error signal output).
26	KICK	O	Kick pulse output.
27	TRD	O	Tracking drive output.
28	FOD	O	Focus drive output.
29	VREF	I	Reference voltage for DA output portion (TVD, ECS, TRD, FOD, FBAL, and TBAL).
30	FBAL	O	Focus balance adjusting output.
31	TBAL	O	Tracking balance adjusting output.
32	FE	I	Focus error signal input (Analog input).
33	TE	I	Tracking error signal input (Analog input).
34	RFENV	I	RF envelope signal input (Analog input).
35	VDET	I	Oscillating detection signal input ("H": detecting).
36	OFT	I	Offtrack signal input ("H": Offtrack).
37	TRCRS	I	Track cross signal input.
38	RFDET	I	RF detecting signal input ("L": detecting).
39	BDO	I	Drop out signal input ("H": Drop out).
40	LDON	O	Laser ON signal output ("H": ON).
41	TES	O	Tracking error shunt signal output ("H": shunt).
42	PLAY	O	Play signal output ("H": play).
43	WVEL	O	Double speed status signal output.
44	ARF	I	RF signal input.
45	IREF	I	Reference current input terminal.
46	DRF	I	Bias terminal for DSL.
47	DSLIF	I/O	Loop filter terminal for DSL.
48	PLLIF	I/O	Loop filter terminal for PLL.
49	VCOF	I/O	Loop filter terminal for VCO.
50	AVDD2	I	Power supply for analog circuit (for DSL, PLL and DA output sections).
51	AVSS2	I	Ground for analog circuit (for DSL, PLL and DA output sections).
52	EFM	O	EFM signal output.
53	PCK	O	PLL extract clock output (fPCK=4.321MHz).
54	PDO	O	Phase comparing signal output between EFM signal and PCK signal.
55	SUBC	O	Subcode serial data output.
56	SBCK	I	Clock input for subcode serial output.
57	VSS	I	Ground for oscillating circuit.
58	X1	I	Crystal oscillating circuit input terminal. (f=16.9344MHz).
59	X2	O	Crystal oscillating circuit output terminal (f=16.9344MHz).
60	VDD	I	Power supply for oscillating circuit.
61	BYTCK	O	Byte clock output.
62	CLDCK	O	Subcode frame clock signal output (fCLDCK=7.35kHz).
63	FCLK	O	Crystal frame clock output (fFCLK=7.35kHz).
64	IPFLAG	O	Interpolation flag output ("H": interpolation).
65	FLAG	O	Flag output.
66	CLVS	O	Spindle servo phase synchronous state signal output ("H": CLV, "L": Rough servo).
67	CRC	O	Subcode CRC check result output ("H": OK, "L": NG).
68	DEMPH	O	Deemphasis detecting signal output ("H": ON).
69	RESY	O	Re-synchronous signal output of frame synchronous ("H": synchronous, "L": synchronous come off).
70	RST2	I	Reset terminal for stopped MASH circuit ("L": Reset).
71	TEST	I	Test terminal (normally "H").
72	AVDD1	I	Power supply for analog circuit (Audio output using both as Lch and Rch).
73	OUTL	O	Lch output.
74	AVSS1	I	Ground for analog circuit (Audio output using both as Lch and Rch).
75	OUTR	O	Rch output.
76	RSEL	I	RF signal polarity selective terminal (RSEL="H" at brightness level "H". RSEL="L" at brightness level "L").
77	CSEL	I	Crystal oscillating frequency selective terminal (normally "L").
78	PSEL	I	Test terminal (normally "L").
79	MSEL	I	SMCK and frequency shifting output terminal ("H": SMCK=8.4672MHz, "L": SMCK=4.2336MHz).
80	SSEL	I	SUBQ and mode shifting output terminal ("H": Q code buffer using mode).

AN8805S (IC102)

AN8805S Terminal Function

Pin No	Symbol	I/O	Function
1	PD	I	PD signal input for output monitor of LD.
2	LD	O	Connect to external transistor's base for LD drive.
3	LDON	I	LD APC ON/OFF switching signal.
4	C.CRS	—	Capacitor connecting terminal for CROSS.
5	VCC	—	Power supply connecting terminal.
6	RF	I	RF AMP reversal input terminal. Connect a resistor.
7	RFOUT	O	RF AMP output terminal (reversal AMP).
8	RFIN	I	Input terminal of RF AGC.
9	C. AGC	—	Capacitor connecting terminal for RF AGC loop filter.
10	ARF	O	RF output terminal of after AGC.
11	C. ENV	—	Capacitor connecting terminal for RF.
12	C. EA	—	Capacitor connecting terminal for AMP.
13	C. SBDO	—	Capacitor connecting terminal for low speed detection of dark level DO detection.
14	BDO	O	BDO detection output terminal. Positive logic.
15	C. SBRT	—	Capacitor connecting terminal for low speed detection of OFTR detection.
16	OFTR	O	Output terminal of OFF TRACK detection. Positive logic.
17	NRFDET	O	Output terminal of RF signal amplitude detection. Negative logic.
18	GND	—	GND
19	ENV	O	ENV output terminal.
20	VREF	O	VCC x 0.5(V) output terminal.
21	LD OFF	I	Input terminal of LD APC forcible stop.
22	VDET	O	Output terminal of vibration detection.
23	TEBPF	I	Input terminal of vibration detection.
24	CROSS	O	Output terminal of TE CROSS detection signal.
25	TEOUT	O	Output terminal of TEAMP.
26	TE	I	TEAMP reversal input terminal. Connect a resistor.
27	FEOUT	O	Output terminal of FEAMP.
28	FE	I	FEAMP reversal input terminal. Connect a resistor.
29	FBAL	I	Control signal input terminal of FO balance adjustment.
30	TBAL	I	Control signal input terminal of TE balance adjustment.
31	PDFR	—	Resistor connecting terminal for setting IV converting resistance value of PDE.
32	PDER	—	Resistor connecting terminal for setting IV converting resistance value of PDF.
33	PDE	I	Connect to PIN diode E.
34	PDF	I	Connect to PIN diode F.
35	PDBD	I	Connect to B, D of astigmatism 1/4 divided PD.
36	PDAC	I	Connect to A, C of astigmatism 1/4 divided PD.

AN8389S (IC101)

AN8389S Terminal Function

Pin No.	Symbol	I/O	DC Voltage (Vcc/8V)	Equivalent Circuit Diagram	Function
1	SVcc	I	8V	①	SVcc terminal for driver control circuit, not connected to power Vcc terminal.
2	Vref	I	2.5V	②	Verf input terminal.
3	IN4	I	2.5V	④ or ③	Driver 4 error input terminal.
4	IN3	I	2.5V		Driver 3 error input terminal.
5	SGND	I	0V	⑤	SGND terminal for driver control circuit.
6	NC				
7	NRESET	O	—	⑦	Reset output terminal.
8	SGND	I	0V	⑧	SGND terminal for driver control circuit.

Pin No.	Symbol	I/O	DC Voltage (Vcc/8V)	Equivalent Circuit Diagram	Function
9	IN2	I	2.5V	⑨	Driver 2 error input terminal.
10	PC2	I	0V	⑩	Control power cutting input terminal to ⑰ ⑱ output.
11	IN1	I	2.5V	⑪	Driver 1 error input terminal.
12	PC1	I	0V	⑫	Control power cutting input terminal to ⑮ and ⑯ output.
13	PVcc1	I	8V	⑬	Supply current feeding ⑮ ~ ⑱ power output transistor from Vcc power supply terminal.
14	PGND1	I	0V	⑭	P GND terminal for ⑮ ~ ⑱ output transistor.
15	D1 -	O	0V	⑰ ⑮ or or ⑲ ⑱ ②① ①⑦ or or ②② ①⑧	Driver 1 inverting output terminal.
16	D1 +	O	0V		Driver 1 noninverting output terminal.
17	D2 -	O	0V		Driver 2 inverting output terminal.
18	D2 +	O	0V		Driver 2 noninverting output terminal.
19	D3 -	O	0V		Driver 3 inverting output terminal.
20	D3 +	O	0V		Driver noninverting output terminal.
21	D4 -	O	0V		Driver 4 noninverting output terminal
22	D4 +	O	0V		Driver 4 noninverting output terminal.
23	PGND2	I	0V	⑳	P GND terminal for ⑲ ~ ⑳ output transistor.
24	PVcc2	I	8V	㉑	Supply current feeding ⑲ ~ ㉑ power output transistor from Vcc power supply terminal.

NOTE FOR PARTS LIST

- Part indicated with the mark "⊕" are not always in stock and possibly to take a long period of time for supplying, or in some case supplying of part may be refused.
- When ordering of part, clearly indicate "I" and "I" (i) to avoid mis-supplying.
- Ordering part without stating its part number can not be supplied.
- Part indicated with the mark "★" is not illustrated in the exploded view.
- Not including Carbon Film ±5%, 1/4W Type in the P.W.Board parts list. (Refer to the Schematic Diagram for those parts.)

WARNING:
Parts marked with this symbol  have critical characteristics.
Use ONLY replacement parts recommended by the manufacturer.

● Resistors

Ex.: **RN** **14K** **2E** **182** **G** **ER**
Type Shape Power Resist- Allowable Others
 and- ance error
 performance

RD : Carbon
RC : Composition
RS : Metal oxide film
RW : Winding
RN : Metal film
RK : Metal mixture

2B : 1/8W
2E : 1/4W
2H : 1/2W
3A : 1W
3D : 2W
3F : 3W
3H : 5W

F : ±1%
G : ±2%
J : ±5%
K : ±10%
M : ±20%

P : Pulse-resistant type
NL : Low noise type
NB : Non-burning type
FR : Fuse-resistor
F : Lead wire forming

*** Resistance**

 ⇒ 1800 ohm = 1.8 kohm
Indicates number of zeros after effective number.
2-digit effective number.

• Units: ohm

 ⇒ 1.2 ohm
1-digit effective number.
2-digit effective number, decimal point indicated by R.

• Units: ohm

● Capacitors

Ex.: **CE** **04W** **1H** **2R2** **M** **BP**
Type Shape Dielectric Capacity Allowable Others
 and- strength error
 performance

CE : Aluminum foil electrolytic
CA : Aluminum solid electrolytic
CS : Tantalum electrolytic
CQ : Film
CK : Ceramic
CC : Ceramic
CP : Oil
CM : Mica
CF : Metallized
CH : Metallized

0J : 6.3V
1A : 10V
1C : 16V
1E : 25V
1V : 35V
1H : 50V
2A : 100V
2B : 125V
2C : 160V
2D : 200V
2E : 250V
2H : 500V
2J : 630V

F : ±1%
G : ±2%
J : ±5%
K : ±10%
M : ±20%
Z : +80%
-20%
P : +100%
-0%
C : ±0.25pF
D : ±0.5pF
= : Others

HS : High stability type
BP : Non-polar type
HR : Ripple-resistant type
DL : For change and discharge
HF : For assuring high frequency
U : UL part
C : CSA part
W : UL-CSA type
F : Lead wire forming

*** Capacity (electrolyte only)**

 ⇒ 2200μF
Indicates number of zeros after effective number.
2-digit effective number.

• Units: μF.

 ⇒ 2.2μF
1-digit effective number.
2-digit effective number, decimal point indicated by R.

• Units: μF.

*** Capacity (except electrolyte)**

 ⇒ 2200pF=0.0022μF
(More than 2) — Indicates number of zeros after effective number.
2-digit effective number.

• Units: μF.

 ⇒ 220pF
(0 or 1) — Indicates number of zeros after effective number.
2-digit effective number.

• Units: pF.

• When the dielectric strength is indicated in AC, "AC" is included after the dielectric strength value.

NOTICE

ALL RESISTANCE VALUES IN OHM. K=1,000 OHM M=1,000,000 OHM
ALL CAPACITANCE VALUES IN MICRO FARAD. P=MICRO-MICRO FARAD
EACH VOLTAGE AND CURRENT ARE MEASURED AT NO SIGNAL INPUT
CONDITION.
CIRCUIT AND PARTS ARE SUBJECT TO CHANGE WITHOUT PRIOR
NOTICE.

WARNING:

Parts marked with this symbol have critical characteristics. Use ONLY replacement parts recommended by the manufacturer.

CAUTION:

Before returning the unit to the customer, make sure you make either (1) a leakage current check or (2) a line to chassis resistance check. If the leakage current exceeds 0.5 milliamperes, or if the resistance from chassis to either side of the power cord is less than 240 kohms, the unit is defective.

WARNING:

DO NOT return the unit to the customer until the problem is located and corrected.
